OVER 40 YEARS DEVOTED TO GROWING HARDY TREES, PLANTS, SHRUBS, EVERGREENS AND ROSES IN THIS LOCATION UNDER THE SAME MANAGEMENT

Where We Are We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Arkansas.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

We Sell Direct, No Salesmen

Save from 75 to 100% in buying direct from the growers. Salesmen are compelled to try to make you believe they have better stock because they have to charge you more for their commission. Buy at our low prices where no salesman's commission is added in the cost of the stock.

We Grow Our Own Stock

Over 35 years devoted to growing hardy Ozark Mountain Grown Nursery Stock. It is grown on the tip top of the Ozark Mountains where the soil and climate conditions are ideal for producing the most vigorous, hardiest, and best rooted trees and plants that can be grown.

Our Stock is Adapted to All Climates

We ship to every state in the Union and many foreign countries. We have cool summer nights and short growing season making our stock well adapted to the extreme Northern, Eastern and Western states as well as being the best for Southern states.

Money Back Guarantee

We guarantee you to be satisfied with our stock. Upon receipt of your order, inspect our plants and if you are not satisfied, return them to us and we will refund the amount paid, plus the transportation charges paid by you.

Low Prices

Why can we sell such high quality stock at such amazing low prices? Because we use extra economy in growing, selling, and shipping nursery stock. We have no salesmen to pay commissions. All this savings is passed on to you in these amazing low prices.

State Inspected

Our trees and plants are inspected by the Arkansas State Plant Board and again by experienced nurserymen before shipping. We guarantee you receive no diseased stock from us. Every plant inspected to protect you from any inferior stock.

Experienced Packing

We use the best material available for packing our orders thereby insuring you that all stock arrives in first class condition and will grow. We've had years of experience in shipping nursery stock.

THIS FALL IS THE BEST TIME TO PLANT THAT ORCHARD

—WHY DO EXPERIMENT STATIONS, AGRICULTURAL COLLEGES AND FRUIT GROWERS RECOMMEND FALL BUYING? Because you can buy this Fall and have the stock shipped to you and "heel it in" so that you may plant at the most favorable time during Fall, Winter, or next Spring.

Fall Planting is becoming more popular each season as experience shows its advantage. As soon as a tree or shrub becomes dormant it can be removed and change of location will affect it but little. When set out in the Fall the bruised roots begin at once to heal and callus is formed; recover quickly from moving;

soon become firmly established and with the first touch of Spring are ready to go into business for themselves in a vigorous way.

Again, the ground is usually in better condition for planting in the Fall than in Spring, for much Spring planting is done when the ground is too wet for best results. Perhaps your Spring will be two or three weeks earlier. In this case your trees should be planted earlier than the dates you have ordered them shipped. If they have been planted in the Fall, these Spring delays are done away with.

THE BEST FROM THE HEART OF THE OZARKS!

BIG JUICY STRAWBERRIES

Important Notice!

A new disease of strawberry plants (Red Stele Root Rot) is very destructive and reports of damage vary from 40 to 92 per cent reduction in fruit crop. No treatment of the disease is known and the fungus will live in the soil for several years making it unprofitable to produce strawberries on the same land where the fungus has been in the soil. This disease is spreading rapidly. DON'T TAKE ANY CHANCE OF GETTING INFESTED PLANTS. ORDER FROM US. Our plants are twice inspected, once in the spring for Red Stele disease, and once in the fall for all kinds of insects and diseases that attack strawberries.

plants. Our plants are found to be apparently free of all diseases. ORDER OUR PLANTS FOR HEALTHY STURDY PLANTS. DON'T GAMBLE ON CHEAP PLANTS AND LOSE YOUR FRUIT CROP.

TWO BRAND NEW STRAWBERRIES

NEW ARMORE—Most recent introduction by University of Missouri, Blakemore X Aroma cross. Large size, firm fruit, which is dark red all the way through. Even though it is an extra large Strawberry, it does not have a core or cavity in the center. Holds up extra well in shipping. All the flowers will mature fruit, and will hold size well until end of season. Ripens 10 days later than Premier. All reports from growers are very enthusiastic. We believe this berry will become a great commercial variety.

It has little or no juice, the pits being filled with a thick syrup or flesh of the berry. Ripens just after Early Harvest. The berries are very large and best quality. Probably the biggest berry ever developed. Imagine berries 1 1/2 to 2 inches long, so large that 20 make a pint, and are so productive that 100 plants produce 50 gallons of fruit the second summer. That is the record of Boysenberry. The beautiful wine-red fruit combines the delicious flavors of Loganberry, Blackberry and Raspberry, of which it is a cross. No new fruit in many years has caused such a sensation as Boysenberry. In addition to all these remarkable qualities, the plants we offer here have NO THORNS.

BENCO'S NEW GOLDEN QUEEN RASPBERRY

A real novelty! A new sensational yellow Raspberry of the black Raspberry type. It is a chance seedling that is a cross between the Red Raspberry and the black Raspberry. It is both a novelty and a great fruit producer—the berry being of a rich golden color of medium size. Its flavor is entirely different from any berry grown—a blend between the red and black Raspberry. In many cases it is grown in the same garden as the black Raspberry.

Just before the berry fully matures it is a rich yellow color, and when fully ripe reaches a rich golden yellow. It is truly a novelty shrub for your garden—the most unusual feature of this new variety is that at first the canes turn a yellow color, which is very outstanding during the winter months. The fruit can be eaten fresh or can also be successfully preserved; again they are very outstanding in a glass fruit jar, for the berries retain their rich golden color. Get some for your garden now.

The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempferi is called the “Orchid of the Garden.” Excellent for cutting it will grow 3 to 4 feet high. Plants thrive in well drained fertile soil (it is fatal to select a location where water stands during winter).

New Chinese CHESTNUT

Trees start bearing when very young, often in 2 to 5 years. Plant at least two trees for good pollination in well drained soil. Makes a beautiful tree for lawn plantings.

Success usually is one of the latest to start growth in spring.
